

# Project Profile

Aloft Hotel | Hillsboro, OR  
Hospitality

## Project Details

Over 160 Stonewood panels in cherry woodgrain adorn the 136-room Aloft Hotel in Hillsboro, OR.

Widewaters Construction, Inc. designed the six-story Aloft Hotel with urban-inspired details, tech-forward sensibility, and a go-with-the-flow attitude. Panels in cherry woodgrain offered a warm and rustic contrast to the clean modernity characteristic of Aloft structures.

When completed, guestrooms will feature high ceilings, plush platform beds, fast and free WiFi, oversized LCD TVs, signature coffee, and walk-in showers with rainfall showerheads and more.
