

Panel Overview

Application	Exterior
Sizes	10mm 48" x 96"
No. of Panels	55
Fasteners	Color matched tek Fastener
Attachment Substrate	5/8 plywood
Color	Monticello Maple

Project Details

Over 50 Stonewood Architectural panels, in Monticello Maple, were installed on the Kennewick Fire Station in Kennewick Washington. The city decided to add a fifth station to provide the fastest response times to the community. Stonewood panels contribute to their need for minimal maintenance as they are non-porous, scratch resistant and easy to clean. The 11,000 sq.ft., \$3.75M building will be completed in the summer of 2016.
