No. of Panels	2 each of 48" x 96"
No. of Panels	464 each of 11.75" x 96" planks
Attachment Substrate	
Color	Monticello Maple

Project Details

Stonewood Architectural Panels and Planks, in Monticello Maple color, were installed on the updated Fire Station #9 in Anchorage, Alaska. The city has spent the last decade updating their fire stations, and Fire Station #9 was moved to a new residential location to better serve the residents, businesses and local highways in the surrounding areas. Stonewood panels were chosen to provide an exterior aesthetic that was consistent with the surrounding single family homes.
