

Project Details

Over 100 Monticello Maple Stonewood Panels were installed on the newly constructed 100th Street Starbucks located in Anchorage, AK. Designed with a UV-blocking surface layer, Stonewood Panels offer superior weather resistance. This will help to ensure that this iconic coffee franchise's exterior continues to look new, despite harsh Alaskan winters. The panels were installed over North Clad Aluminum using color match fasteners for a seamless exterior design. Stonewood Panels are available in custom colors, making them ideal for meeting franchise specifications.
