

Project Profile

Stillaguamish Administration Building | Arlington, WA
Comercial

Panel Overview

Application	Exterior
Building Type	Commercial
No. of Panels	592
Fasteners	Concealed

Project Details

Over 500 Stonewood Architectural Panels adorn the Stillaguamish Administration Building in Arlington, WA.

Built by the architectural firm Womer & Associates, the building was designed to resemble a canoe, with various natural textures and indigenous elements utilized throughout the complex. Architects chose Stonewood Panels in a warm woodgrain to complement the hues of the surrounding landscape, as well as the raw materials that accent the building's interior.

The \$13.8 million administration center is built on tribal trust land adjacent to the Stillaguamish Reservation, and will bring together previously scattered departments.
