

## Panel Overview

Application	Exterior
Building Type	Commercial
Design	Woodgrains
Fasteners	Concealed Fasteners

## Project Details

Over 5,000 sq. ft. of Stonewood Architectural panels were installed on Vista Shopping Center in Vista, CA. The new building features an inviting Stonewood woodgrain with cool undertones. Stonewood Panels were selected over multiple other cladding options as the best façade material to withstand high UV exposure. With a vast woodgrain selection, Stonewood allowed the architects to create an inviting and modern atmosphere, which came as a welcomed contrast to the standard strip mall design.
