Project Details: Leader Dogs For The Blind

The newly renovated Leader Dogs for the Blind building in Rochester Hills, Michigan features over 150 exterior panels in buttery, light-grain maples. Installed on the large soffits, the panels accent the beautiful, new Canine Development Center, an addition to the existing building.

After three years of planning, and meeting with industry experts, the \$14.5M center will offer state-of-the-art space for these leader dogs in training. The center features 255 dog suites, separate puppy and breeding areas, a centralized vet clinic, and a lobby which features a puppy viewing area.
